1 GENERAL PRINCIPLES (EBI)

- 1.1 Funding approval must be secured prior to a referral for an assessment and/or surgery. Referring patients to secondary care without funding approval having been secured not only incurs significant costs in out-patient appointments for patients that may not qualify for surgery, but inappropriately raises the patient's expectation of treatment
- 1.2 On limited occasions, we may approve funding for an assessment only in order to confirm or obtain evidence demonstrating whether a patient meets the criteria for funding. In such cases, patients should be made aware that the assessment does not mean that they will be provided with surgery and surgery will only be provided where it can be demonstrated that the patients meets the criteria to access treatment in this policy
- 1.3 Funding approval will only be given where there is evidence that the treatment requested is effective and the patient has the potential to benefit from the proposed treatment. Where it is demonstrated that patients have previously been provided with the treatment with limited or diminishing benefit, funding approval is unlikely to be agreed
- 1.4 Receiving funding approval does not confirm that they will receive treatment or surgery for a condition as a consent discussion will need to be undertaken with a clinician prior to treatment
- 1.5 The policy does not apply to patients with suspected malignancy who should continue to be referred under 2 week wait pathway rules for assessment and testing as appropriate
- 1.6 Patients with an elevated BMI of 30 or more may experience more post-surgical complications including post-surgical wound infection so should be encouraged to lose weight further prior to seeking surgery.
<https://www.sciencedirect.com/science/article/pii/S1198743X15007193>
(Thelwall, 2015)
- 1.7 Patients who are smokers should be referred to smoking cessation services in order to reduce the risk of surgery and improve healing

2 POLICY CRITERIA NOT COMMISSIONED

- 2.1 Scar revision surgery / treatment is not routinely commissioned
- 2.2 Scars that result in clinical physical disability (due to contractures, tethering or recurrent breakdown) may be considered
- 2.3 Keloid Scars

- Applications will be considered where there is significant scarring on the face or where the result is physical distress due to significant pain or pruritis
- Treatment or surgery to scars on other parts of the body is not routinely commissioned (including scars that are secondary to ear or other body piercing procedures)

2.4 Scars secondary to trauma / accidents

- Facial scar revision may be considered where exceptionality can be demonstrated (in terms of size and disfigurement)
- Scar revision on other parts of the body for cosmetic purposes is not routinely commissioned

2.5 Revision of scars that are the result of self-harm is not routinely commissioned

2.6 An EBI application requires evidence of some unusual or unique clinical factor about the patient that suggests they are exceptional. This should demonstrate they are:

- Significantly different to the general population with the condition in question
- Likely to gain significantly more benefit from the intervention than might be expected from the average person with the condition

2.7 Each application should be accompanied by photographic supporting evidence

3 EVIDENCE BASED INTERVENTIONS APPLICATION PROCESS

3.1 Patients who are not eligible for treatment under this policy may be considered on an individual basis where their GP or Consultant believes exceptional circumstances exist that warrant deviation from the rule of this policy

3.2 Completion of a **Generic EBI Application Form** by a patient's GP or Consultant is required

3.3 Applications cannot be considered from patients personally

3.4 Only electronically completed EBI applications will be accepted to the EBI Service

3.5 It is expected that clinicians will have ensured that the patient, on behalf of who they are forwarding the application for, is appropriately informed about the existing policies prior to an application to the EBI service. This will reassure the service that the patient has a reasonable expectation of the outcome of the application and its context

- 3.6 EBI applications are reviewed and considered against clinical exceptionalality

For further information on 'clinical exceptionalality' please refer to the NHS England information using the link below page 9-13;

<https://www.england.nhs.uk/wp-content/uploads/2017/11/comm-policy-individual-funding-requests.pdf>

- 3.7 Social, Emotional and Environmental factors *i.e. income, housing, environmental pollution, access to services, family, friends, ethnicity, life experiences etc.* CANNOT be considered with an application

- 3.8 Where appropriate photographic supporting evidence can be forwarded with the application form

- 3.9 An application put forward for consideration must demonstrated some unusual or unique clinical factor about the patient that suggests they are exceptional as defined below:

- Significantly different to the general population of patients with the condition in question
- Likely to gain significantly more benefit from the intervention than might be expected from the average patient with the condition

4 ACCESS TO POLICY

- 4.1 If you would like further copies of this policy or need it in another format, such as Braille or another language, please contact the Patient Advice and Liaison Service on Telephone number: 08000 851067

- 4.2 **Or write to us:** NHS Somerset ICB, Freepost RRKL-XKSC-ACSG, Yeovil, Somerset, BA22 8HR or **Email us:** somicb.pals@nhs.net
